Professional Summary

Senior Front-End Engineer with 15+ years of experience architecting scalable, performant, and accessible web applications. Specialized in React, Angular, and micro-frontend architecture. Proven track record of leading engineering initiatives, improving developer productivity, and delivering customer-facing features at scale.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Libraries: React, AngularJS, Redux, NestJS

Tools: Webpack, NxJS, Jenkins, AWS, Figma, Jest, Cursor, Claude AI

Testing: Storybook, Mocha, Chai, Jest, Protractor

Databases: MySQL, PostgreSQL

Runtime: NodeJS

Senior Front End Engineer — WorkBoard AI

Jan 2022 – Jan 2026

- Architected and implemented micro-frontend architecture using Module Federation
- Led design & development of responsive navigation used by 100K+ users, launched in 8 months with zero critical issues
- Integrated modern navigation with legacy app via Broadcast API
- Drove accessibility compliance for the main navigation
- Built REST APIs with NestJS/NodeJS to consume legacy MySQL data
- Developed a Gen AI chat UI prototype for an internal hackathon

Stack: React, Redux, React Query, NxJS, Redux Toolkit, NodeJS/NestJS, MySQL, TypeScript, Webpack, Figma

Lead Front End Engineer — Oracle

Aug 2017 – Jan 2022

- Led migration of legacy AngularJS application to Angular 5 and React
- Contributed to the React core team with accessible widgets and reusable UI components
- Developed a component library improving developer velocity across teams
- Standardized form validation patterns and submission workflows

Stack: Angular, React, Mocha, Chai, Jest, Ava, Storybook/Loki, Node.js, Java

Senior Software Consultant — Northrop Grumman

Feb 2017 – Aug 2017

- Contributed to Disability Case Processing System for the Social Security Administration

Stack: React, Flux, Node.js, PostgreSQL.

Principal Architect — Fusion Media Group

Nov 2015 – Jan 2017

- Led full-stack development initiatives using modern JS tooling and architecture
- Set up Universal React seed projects, build pipelines, and performance optimizations
- Improved API performance with Redis/AWS ElastiCache
- Mentored a team of React developers; established UI development best practices
- Built D3.js-based analytics dashboards and lazy-loading ad components

Stack: Node, Express, Redis, React, Redux, Webpack, WordPress, Jenkins, AWS, NGINX

Senior Software Engineer — Condé Nast

Mar 2012 – Nov 2015

- Architected subscription analytics client using React & WebSockets
- Built cross-origin social/brand sign-on workflows without page refresh
- Led front-end architecture for The New Yorker Newsstand app and push notification systems
- Implemented RESTful front-end and optimized builds for iPhone storefront
- Developed modular AngularJS apps with Jasmine testing and automated builds

Stack: HTML5, CSS3, ReactJS, Flux, AngularJS, RequireJS, Backbone, Grunt, Karma, Protractor, Jasmine, LESS.

Early Career

Focused on front-end architecture, responsive design, and UI development for high-traffic financial and media platforms

- **Senior Software Developer** — TD Ameritrade (Aug 2007 – Mar 2012)
- **Presentation Layer Developer** — Avenue A Razorfish (May 2007 – Aug 2007)
- **Client Side Developer** — Ameritrade (Jun 2006 – May 2007)

Education

MS, Computer Science, Missouri University of Science and Technology, 2003

BS, Computer Science and Engineering, University of Madras, 2000

Awards

- 🏆 People's Choice Award Winner — Internal hackathon, Condé Nast
- 🏆 Toshiba Scholarship 2012–2013 — Missouri University of Science and Technology
